

# Hillfield Strathallan College

Here Excellence is a Way of Life

## Thoughts from our Faculty:

“A seed needs fertile soil and careful cultivation in order to mature fully. That Hillfield Strathallan College provides such an environment in which students develop both social responsibility and academic aptitude can be seen by the constantly high results of our graduating students”

**Mr. Geoffrey Steel, Retired Faculty & former Senior Master**

“The needs of young people have not really changed that much over the last three decades. They still want to be valued, loved, respected, challenged, guided and inspired to learn. Over the years the senior school has modified its program, some aspects of its core philosophy and details of its physical layout in an effort to better meet those needs. I believe that Transformation HSC lays the groundwork for a giant leap forward in creating a more dynamic environment in which the development of character, intellect, leadership, information skills and good citizenship can continue to occur. We want our graduates not only to be able to adapt to a rapidly changing society, but also to help create a new society that better meets the needs of themselves and others. The philosophical and pedagogical foundations of Transformation HSC are both exciting and full of promise. As a community we can see that HSC remains a creative community that strives to allow each and every member to move from potential to exciting reality.”

**Mr. Mark Hudson, Senior School Faculty Member**

"Over 30 years ago, we enrolled our 3-year-old daughter at HSC for reasons that aligned with our personal values. The college's strong sense of family community, academic principles and the importance placed on the development of the whole child resonated with us. These qualities are the same reasons that I have remained an engaged and involved teacher here at HSC for over 25 years."

**Jacqueline Teggart, Montessori Faculty Member**
